GREAT LAKES TIMBER SCRIBE

This timber scribe has been designed and manufactured by a professional surveyor. The original has been in use for more than 20 years and now is being offered to others in the surveying profession. We are proud to state this product is 100% made in the USA.

It features a double edged cutting blade that forms a 5/8" radius for right or left hand curved letter and number cuts as well as an additional cutting edge for straight lines. There is no need for allen wrench adjustments to modify the tool to make these cuts as other scribes require.

The steel cutter has been mildly tempered to maintain an edge while allowing for easy sharpening with a 5/32" chain saw file. A bright red resin handle was chosen if you drop it in the field. A more perfectly balanced, easy to maintain and well designed scribe can not be found in production anywhere.

It is shipped to you with a 5/32" chain saw file and in a sturdy belt looped leather holster, strongly stitched and riveted to last a life time just like the scribe it carries. Make your mark on your next set of bearing trees with this Great Lakes Timber Scribe. Your name or company (up to 20 characters) can be embossed into the handle at no additional cost.

YES! Please mail the Great Lakes Timber Scribe with leather sheath to the following address:

Name: _____

Address: _____

City, State, ZIP: _____

Phone: _____
